

Highly motivated Information Engineer with over 2 years of experience in software development. Possesses excellent interpersonal skills and strong visualization abilities for effective communication and presentation of ideas. Demonstrated work ethic and dedication to achieving project goals. I am fluent in Arabic and English.

- * Developed a full-featured REST API e-learning platform with course management, video streaming (), phone-based authentication with OTP, student enrollment tracking, quiz system, and role-based access control.
 - * Implemented resumable video uploads, asynchronous task processing with , and a scalable cloud storage architecture.
 - * Led the development of a scalable backend visit management platform for a large enterprise organization, handling appointment scheduling, QR-based check-ins, and role-based access control for 500+ daily visitors. Built with REST Framework, , and .
 - * Reduced manual visitor processing time by by introducing automated appointment and check-in workflows
 - * Implemented secure access control with auditable check-in records for compliance and traceability
 - * Worked with systems, specifically , supporting sales and customer service operations.
 - * Assisted in managing sales workflows, including quotations, sales orders, invoices, and customer records.
 - * Helped ensure data accuracy and consistency across sales-related modules.
-
- * Developed RESTful backend API for Setalkel platform using , powering web application, admin dashboard, and mobile ordering app.
 - * Implemented product catalog with variants and categories, order management system with container-based shipping, multi-tier pricing supporting user-specific rates, role-based access control, push notifications, and analytics dashboard.

* Contributed to maintaining, building and deploying services using _____ and _____ for MTN Cash mobile project.

* Developed a medical application for booking appointments and medical tests using _____ and _____.

* Developed automation projects using UiPath tool to streamline processes and increase productivity

* Implemented RPA solutions that reduced manual labor by 70% in various departments

* Conducted testing and maintenance of automated systems, ensuring optimal performance and reliability

* Assisted in the development of complex software applications using PHP and Python programming languages

* Contributed to code reviews and debugging, ensuring high-quality output

* Collaborated with cross-functional teams to deliver projects on time and within budget.

*_

Django REST API platform with course management, video streaming (Bunny Storage CDN and Streaming), phone-based OTP authentication, student enrollment, quizzes, and role-based access control. Features resumable uploads, Celery async processing, and scalable cloud architecture.

Django 5.0+ | Django REST Framework | PostgreSQL | JWT Auth | Celery + Redis | Bunny Stream and Storage CDN | Docker

*_

Developed RESTful backend API for Setalkel platform, powering web application, admin dashboard, and mobile ordering app. Implemented product catalog with variants and categories, order management system with container-based shipping, multi-tier pricing supporting user-specific rates, role-based access control, Firebase push notifications, and analytics dashboard. Laravel 10, Laravel Sanctum, Spatie Permissions, Firebase Cloud Messaging, MySQL, RESTful APIs.

*_

Developed a medical application for booking doctor appointments and tests using Spring boot and Oracle. [[link](#)]

*_-

Developed an AI-powered tool to automate the creation of CVs for client, achieved a 92% accuracy rate in generating personalized and impactful CVs and Streamlined the process of creating CVs, saving time and increasing efficiency.

Showcased at FMEE Exhibition, Damascus University, [2024], recognized for innovation in automating professional document creation.

*_-

Developed a simple employee-customer app that demonstrates Spring cloud features: microservices, Eureka, RestTemplate, FeignClient and MySQL.

*_-

A backend system designed for a service-based or marketing-oriented platform where businesses can promote offerings, customers can book them, and real-time interaction is optimized through smart backend design.[[link](#)]

*_-

Project for providing fix-repair services using Laravel+Postgresql.[[link](#)]

*_-

C++, C#, Python, PHP, Laravel, Java, Springboot, Spring cloud, Golang, Revel, Oracle, Postgresql, MySQL.

*_-

Git, Eureka, Postman, Docker.

*_-

Visual Studio, Visual Studio Code, IntelliJ, Goland, DataGrip, PgAdmin.

*- Strong visualization abilities for effective presentation of ideas or concepts.

*- Excellent interpersonal skills for clear and concise communication with clients or colleagues.

*- Demonstrated work ethic and dedication to achieving project goals.

Hobbies:

- *- Enjoy spending time with friends.
- *- Have a passion for traveling and exploring new places.

Languages:

- *- Native Arabic speaker.
- *- Fluent in English.
