SUMMARY

───────────────────────────────

Highly motivated Information Engineer with over 1 year of experience in software development. Possesses excellent interpersonal skills and strong visualization abilities for effective communication and presentation of ideas. Demonstrated work ethic and dedication to achieving project goals. I am fluent in Arabic and English.

EXPERIENCE

───────────────────────────────

Backend Developer | OneDoor | October 2025 – Present

* Developed a full-featured Django REST API e-learning platform with course management, video streaming (Bunny Storage CDN and Streaming), phone-based authentication with OTP, student enrollment tracking, quiz system, and role-based access control.
* Implemented resumable video uploads, asynchronous task processing with Celery, and a scalable cloud storage architecture.

Backend Developer | No Name Group | July 2025 – October 2025

* Developed RESTful backend API for Setalkel platform, powering web application, admin dashboard, and mobile ordering app.

* Implemented product catalog with variants and categories, order management system with container-based shipping, multi-tier pricing supporting user-specific rates, role-based access control, Firebase push notifications, and analytics dashboard.

Backend Developer | Apps&more | August 2024 – December 2024

* Contributed to maintaining, building and deploying services using Golang and Docker for MTN Cash mobile project.

* Developed a medical application for booking appointments and medical tests using Spring Boot and Oracle.

Robotic Process Automation Intern | Brainstorm | November 2022 - March 2023

* Developed automation projects using UiPath tool to streamline processes and increase productivity
 * Implemented RPA solutions that reduced manual labor by 70% in various departments
 * Conducted testing and maintenance of automated systems, ensuring optimal performance and reliability

Programming intern

* Assisted in the development of complex software applications using PHP and Python programming languages
 * Contributed to code reviews and debugging, ensuring high-quality output
 * Collaborated with cross-functional teams to deliver projects on time and within budget.

EDUCATION

―――――――――――――――――

* High School Diploma from Private School, Sharjah, UAE
  * Bachelor's Degree in Informatics Engineering, International University of Science and Technology (IUST), Damascus, Syria

PROJECTS

―――――――――――――――――

*- **E-learning platform**

> **Description:** Django REST API platform with course management, video streaming (Bunny Storage CDN and Streaming), phone-based OTP authentication, student enrollment, quizzes, and role-based access control. Features resumable uploads, Celery async processing, and scalable cloud architecture.
>
> **Technologies:** Django 5.0+ | Django REST Framework | PostgreSQL | JWT Auth | Celery + Redis | Bunny Stream and Storage CDN | Docker

*- **Setalkel**

> **Description:** Developed RESTful backend API for Setalkel platform, powering web application, admin dashboard, and mobile ordering app. Implemented product catalog with variants and categories, order management system with container-based shipping, multi-tier pricing supporting user-specific rates, role-based access control, Firebase push notifications, and analytics dashboard. [link]
>
> **Technologies:** Laravel 10, Laravel Sanctum, Spatie Permissions, Firebase Cloud Messaging, MySQL, RESTful APIs.

*- **Medical App**

> **Description:** Developed a medical application for booking doctor appointments and tests using Spring boot and Oracle. [link]

*- **Chatbot-based Smart CV maker**

Description: Developed an AI-powered tool to automate the creation of CVs for client, achieved a 92% accuracy rate in generating personalized and impactful CVs and Streamlined the process of creating CVs, saving time and increasing efficiency.

Key Achievement: Showcased at FMEE Exhibition, Damascus University, [2024], recognized for innovation in automating professional document creation.

*- **Employee-Customer management App**

Description: Developed a simple employee-customer app that demonstrates Spring cloud features: microservices, Eureka, RestTemplate, FeignClient and MySQL.

*- **Marketing**

Description: A backend system designed for a service-based or marketing-oriented platform where businesses can promote offerings, customers can book them, and real-time interaction is optimized through smart backend design.[link]

*- **Reparo**

Description: Project for providing fix-repair services using Laravel+Postgresql.[link]

SKILLS

───

*- **Languages & Frameworks:** C++, C#, Python, PHP, Laravel, Java, Springboot, Spring cloud, Golang, Revel, Oracle, Postgresql, MySQL.

*- **Development Tools:** Git, Eureka, Postman, Docker.

*- **IDE's:** Visual Studio, Visual Studio Code, IntelliJ, Goland, DataGrip, PgAdmin.

*- Strong visualization abilities for effective presentation of ideas or concepts.
  *- Excellent interpersonal skills for clear and concise communication with clients or colleagues.
  *- Demonstrated work ethic and dedication to achieving project goals.

ADDITIONAL INFORMATION

───

Hobbies:
  *- Enjoy spending time with friends.
  *- Have a passion for traveling and exploring new places.
Languages:
  *- Native Arabic speaker.
  *- Fluent in English.
